DATE MAILED:

Please find below and/or attached an Office communication concerning this application or proceeding.

Commissioner for Patents

The prior art references cited on the IDS submitted Feb 2, 2010 were reviewed and considered. None of these references clearly shows or discloses a charge pump apparatus, or method for generating an output supply (e.g. from a charge pump) by transferring a charge, as cited within the instant application's independent claims. For example, see the application's Notice of Allowance for specific details related to the Reasons for Allowance.

Although the original cited references 1, 4 and 5 are lined through on the IDS, these references were then added after modification(s) to correct inadvertent type errors (e.g. typos) to ensure the proper publication date, document number, and/or name of patentee, corresponds to the actual reference.

Attachment: IDS dated 20100202
